WITHFUND WITH FUND

Providing investment services that can solve the diversified of P2P finance a once

Our Service

P2P Integrated platform to provide convenient investment system

The most important point in stable asset management is to hedge the list of P2P financial product investments by constructing a portfolio of products of various p2p financial companies and conducting diversified investments, WITH FUND provides a variety of services to make P2P investment safe and easy.

The 3 Key point technologies of WITH FUND

WITH FUND Integrated system of members is that allows investors to invest in multiple P2P companies without membership registration by signing up.

The product information linkage system collects and displays multiple platforms and P2P financial products in one place. Investors can compare and analyze at WITH FUND, construct their preferred portfolio of returns and products, and invest directly.

The payment system has allowed investors to deposit into one account of the WITH FUND, and to easily settle the investment money at once for products of multiple P2P companies. And you can receive intensive repayment of the proceeds of the invested project through the WITH FUND deposit account.

Finhaven Technology #Finhaven

Finhaven is developing a capital market infrastructure for digital securities and currencies with the vision of integrating global capital markets.

Our Service

Finhaven is developing a capital market infrastructure (the Finhaven Investment Platform) for digital securities and currencies with the vision of integrating global capital markets. The platform leverages blockchain technology and covers KYC, AML, Suitability, Capital Raise, Primary Distribution, Marketplace, Settlement, Depository, Investor Relations, and Corporate Action Management. The Finhaven Investment Platform stands on the Finhaven Distributed Network (FDN). The FDN is composed of Private Markets (PM) and Public Markets (P2).

Finhaven Capital Inc., a wholly-owned subsidiary of Finhaven, is ready to open the Finhaven Private Market on the Finhaven Investment Platform in Canada. After undergoing a rigorous review process with the Canadian Securities Administrators with the British Columbia Securities Commission as its principal regulator, FinCap has been authorized as an Exempt Market Dealer (EMD).

Finhaven Private Market is a digital market that directly connects issuers to investors, as well as investors to investors. Finhaven has been engaged in multiple discussions to license the Finhaven Investment Platform to other market participants,

redot - Smartphone Digital Forensic Solution

Our Service

redot supports recovering deleted data, unlocking device locks and detecting potential harmful threats. By using proprietary and original technologies, it can examine the device thoroughly and provide safe and secure mobile banking environment.

DataUniverse 🕏 DataUniverse

For a better world, social problems such as financial fraud and personal information leakage are solved through ICT.

Our Service

- 1. Anti-Scam Service Based on registered patents, scam protection services provide 'current and major fraud type notification' and 'family protection notification', 'detection of malicious apps and remote control apps', and 'phishing insurance' through combination analysis of fraud related big data and fraud data reported to financial institutions and affiliates.
- 2. Al Autocall In the event of an unpleasant situation due to a possible dual parking problem, the driver can be called without a phone number on the ARS screen, and the service prevents damage such as scam, smishing, and spam when the driver's contact information is displayed on the parking plate.
- 3. MFinder This service maximizes the possibility of recovering lost cell phones through remote camera control, forced video call, location check, and notification sound before the battery is discharged, and minimizes the risk of personal information leakage due to data backup and mobile phone initialization.

Medical Fintech Solution incorporated

The company operates Mo-om, Korea's first intelligent underwriting system. The system uses a convenient app to process complex insurance subscription screening in real-time and at low cost. Korean insurance companies such as Shinhan, Orange Life, Hana, Tong Yang, Heungkuk, DB, DGB, and KB Life are using this system.

Tobecon's intelligent underwriting system is the first in Korea to utilize health examination data and drug administration information. It also has the largest drug index in Korea, with 23 indexes per drug. Through this, the company has an underwriting system using various types of drug administration.

In addition, the company provides healthcare contents such as health age, disease prediction, and daily health age to Shinhan Life Insurance. The platform is also provided as a premium service for VIP customers of Korean department stores. In addition, the company uses premium health checkup reports that analyzes health examination data to expand into Chinese and Taiwanese markets
